

How DARE anyone try to stop me from getting a service that I PAY for. I don't yet have weather and traffic in my town - but I WILL USE IT when it becomes available here. The local stations with all their nonsense, constant format changes, and incessant useless local advertising are a waste of my time. It's the inability to provide me with information WHEN I NEED it that is useless to me. I spend 2 hours a day in my car, and I am paying for the right to have commercial free music of every type imaginable, not restricted in any way. Leave my XM Satellite Radio ALONE!
